CORE TECHNOLOGIES

Languages: Go, Java, Kotlin, Scala, Python, TypeScript / JavaScript, C#, SQL / PL-SQL

Cloud & Cloud-Native: Kubernetes (EKS), custom operators / controllers, Helm, Docker, Terraform, AWS, GCP, Apigee, CI/CD

Distributed Systems & Data: Microservices, event sourcing, Kafka, Google Pub/Sub, SQS/SNS, BigTable, DynamoDB, PostgreSQL, Oracle, PySpark

Observability: Grafana, Dynatrace, Sumologic, Catchpoint

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Rocket Lawyer · 02/2023 – Present

- Partnered with the DevOps team to build **custom Kubernetes operators in Go** that automate deployment of Grafana dashboards and Dynatrace components/alerts, codifying observability as reconciled cluster resources.
- Migration of the entire ERP database from HBase (Cassandra-like DB) to Google BigTable.
- Data extraction from Sumologic / Catchpoint — metrics for error rate, availability, and TTI.
- Apigee Edge to Apigee X migration for company APIs.
- Legacy applications refactor, moving from a RabbitMQ exchange architecture to a REST API + Google Pub/Sub architecture.
- Refactor of the business-events API responsible for collecting user interactions with the platform.
- Leader of the Global Salesforce project, unifying all countries' platforms in a single Salesforce instance.
- Leader of the Recommendation Engine project — event sources with ML algorithms (Python / scikit-learn) to recommend activities to customers.
- Leader of Customer 360 — a 360° view of customers from internal/external data, using Gemini LLMs and embeddings for retrieval-augmented insight and a new legal-compliance tool.

Software Engineer — Jusbrasil · 01/2022 – 02/2023

- Big Data team: owned the Documents Pipeline (Cloud Functions, Python APIs, Google Pub/Sub, GCS, PySpark loading jobs, Kafka as message broker).
- User Journey team: big-accounts platform (Next.js, Node + React) and Scala/Java projects (Box API, plan management).
- Payments team: payments platform with Node.js and Scala.

Software Developer — Bet.Works / Bally's Interactive · 01/2021 – 01/2022

- Retail team: microservices (Spring Boot) and front-ends (Angular).
- Migrated the platform to a Kubernetes environment and rebuilt it to a microservice architecture with Kafka and per-service databases.

Tech Lead — Zup Innovation · 05/2021 – 09/2021

- Lead of the Open Banking project: microservices (Spring Boot, Micronaut, Kotlin), GitLab CI, SQS/SNS and Kafka, Terraform IaC, DynamoDB.

Tech Lead — Invillia / iFood · 11/2020 – 04/2021

- Lead of the Logistics Tribe: microservices (Spring Boot, Akka); experiments with Apache Thrift and Protobuf for high-volume data; MQTT telemetry; Jenkins / GitLab CI.

Software Architect — Invillia / UOL · 05/2020 – 10/2020

- Microservices (Java/Spring Boot, Node/NestJS/GraphQL); micro-frontends (Angular, Angular Elements); Jenkins CI; Kubernetes scripts for automated deployments.

Software Architect — Impulso Network · 01/2020 – 05/2020

- Microservices (Ruby on Rails) for Order Manager — Cielo LIO integration; Angular front-ends; software for Cielo LIO payment machines.

Systems Analyst — TCE-MT · 02/2016 – 12/2019

- Java & BI architect on Conex-e (External Electronic Control); JBoss EAP 6/7 administration; CI environment (Jenkins, Artifactory, SonarQube, Docker); Git (BitBucket).
- Architect of Radar (Public Purchases / electronic analysis of public notices — Python + scikit-learn ML, Tesseract OCR), SECORP (Corporate Security), and the Digital Document Signature project.

IT Consultant — Ábaco Tecnologia / MT · 08/2007 – 02/2016

- Oracle RAC 11g installation (FIEMT); BI project at TCE-MT; Java architect on Conex-e; mobile architect on GeoObras-MT.
- PL/SQL & Oracle Data Integrator loads; subject areas and dashboards; Genexus import/validation tooling; SISPREV pension system; Linux servers (OC4J, Tomcat, Oracle 9i/10g); digital document certification (Java 1.5).

Analyst — Connect Informática · 11/2005 – 02/2007

- Systems maintenance for SESI (Delphi + SQL Server); ASP.NET / C# development pattern; new systems for SESI-SC (SPPA hearing-loss prevention, corporate consulting, education modules); audit automation in Java.

Analyst / Programmer — Vector Informática · 11/2004 – 10/2005

- PHARMA distributor management (Delphi + SQL Server); cashier-system integrations; EASY sales-force automation in Java.

Project Manager — Datalab do Brasil · 11/2003 – 11/2004

- GESVEN management system (PICK Basic / UNIX); mobile-to-management integrations (VB6); Embedded VB mobile sales; enterprise intranet (ASP.NET 1.1, C#, SQL Server).

EDUCATION

Machine Learning & AI — FIAP (2024–2025) · **Information Technology Specialist** — FASIPE (2017–2019) · Oracle Database 11g (OCA)

ADDITIONAL EXPERIENCE & COMMUNITY

Impulso Network community ambassador · Volunteer, open-source Delivery SOS (entregasos.com.br) · Invillia Insiders mentoring · RECODE program · Hackathons for socially vulnerable communities

SELECTED FREELANCE PROJECTS

DGFit — personal-trainer management (Spring Boot APIs, React Native). **Virti** — VPN/RDP/remote-app management (C#/WinForms, Spring Boot, Terraform). **Vicentini Andrade Advocacia** — PDF analysis & document generation (Django/Python, Angular). **CP4 Construction** — sales/works platform (Django, React Native). **Aprovando Online** — course e-commerce (Java 8, Postgres, Tomcat).

LANGUAGES

Portuguese (native) · English (professional)
